

Education

Graduated **Bachelor of Arts in Computer Science**, *Dartmouth College*, Hanover, NH
June 2025 GPA: 3.93 / 4.0

Professional Experience

- October 2025 – Present **Software Engineer**, *Walmart Global Tech*, Sunnyvale, CA
- Led full-stack development of a Customer Favorites program (\$13M projected sales impact), building the backend eligibility engine and all frontend UI including real-time KPI dashboards that help hundreds of thousands of sellers prioritize their best-performing products.
 - Designed and shipped features across multiple microservices (\$2.5M combined impact) that personalize savings opportunities for sellers and automate risk assessment — identifying and resolving a production-facing bug within hours of discovery.
 - Built a self-service tag management portal (\$1.2M impact) that lets internal teams categorize and target sellers at scale, replacing a previously manual process.
 - Overhauled observability infrastructure across multiple backend services, implementing end-to-end request tracing and real-time monitoring dashboards that significantly reduced debugging time.
- January 2022 – June 2025 **Lead Software Developer, Mentor & AR/VR Lead**, *DALI Lab (Dartmouth College)*, Hanover, NH
- Executed end-to-end full-lifecycle development (0 to 100) on client-facing applications across 4 continuous years in a high-impact, student-run innovation lab.
 - Directed technical strategy and oversaw development for all AR/VR projects, defining engineering standards, pipelines, and mixed-reality architectures.
 - Partnered directly with global stakeholders and non-profit clients, leading development for the **Salvador Dalí Museum** (eye-tracking exhibit in FL), **Benchmark Space Systems** (spacetech software), and **BRIC** (educational tech tools for underserved communities in VT).
 - Mentored and onboarded incoming developers, leading technical reviews, pair programming, and architectural design workshops across multi-disciplinary teams.
- June 2024 – August 2024 **Software Engineer Intern**, *Walmart Global Tech*, Sunnyvale, CA
- Built upon orchestration layer microservices for the accounts page on Walmart.com using **TypeScript**, **GraphQL**, **Docker**, and **Kubernetes**.
 - Devised and executed a method to convert backend calls to a new monorepo structure, leveraging a custom wrapper function and complex TypeScript functionalities to minimize code changes.
- September 2023 – December 2023 **Software Engineer Intern**, *Neptune Flood*, St. Petersburg, FL
- Refined & enhanced Vue.js web applications and underlying APIs built on **.NET/C#**, **LINQ**, and **SQL Server**.
 - Collaborated with QA engineers, senior developers, and clients to ship full-stack features, managing database migrations, custom backend endpoints, and complex querying algorithms.

Academic Leadership

- March 2024 – June 2025 **Teaching Assistant**, *Dartmouth College*, Hanover, NH, Full Stack Web Development
- Conducted regular office hours and technical support sessions for a project-based full-stack engineering course.
 - Guided students through architectural design and debugging across a comprehensive stack including **HTML/CSS**, **JavaScript/TypeScript**, **React**, **Express.js**, and **MongoDB**.

Projects

- Apr 2024 **What The Yap? - HackDartmouth IX First Place**, React / Express.js / Azure Speech SDK / GPT
- Architected a voice-interactive, hands-free study assistant in under 24 hours with a team of 3, enabling active recall learning via document parsing and automated question generation.
 - Integrated **Azure Speech SDK** for voice interaction and **OpenAI API** for content generation, leveraging **Zustand** for state management, **Firebase** for authentication/storage, and **Tailwind CSS** for styling.

2023 – 2024 **dPiction**, *TypeScript / Vue.js / Node.js*

- Realtime full-stack web adaptation of Pictionary from scratch utilizing JavaScript's **WebSocket API** and **Tailwind CSS**.

2020 – 2021 **Cookie Clicker but You Type**, *Unity 2D / C# / Steam*

- Designed, produced, and published an addictive progression-based desktop typing game on the Steam store with thousands of players across many countries.

Skills & Interests

Languages **Java, TypeScript, C#**, JavaScript, SQL, Python, C/C++, Rust

Frameworks & Tools Spring Boot, .NET, Node.js, Express.js, GraphQL, Vue.js, React, React Native, Docker, Kubernetes

Interests Hardware modeling & 3D printing, Surfing & Snowboarding, Hiking & Camping, Alarm Clocks
